PROGRAM HIGHLIGHTS

Pathway to Renal Surgery

This session will navigate through the career trajectory of a young urologist to becoming a renal surgeon. Gain insights into the necessary training, education, and hands-on experience required to excel in this specialty.

Team Dynamics in Urology

Discuss the significance of collaboration and team synergy in surgical success. Discover the roles and responsibilities within a surgical team and how to effectively contribute to and lead a team in high-pressure environments.

Interactive Case Studies

This interactive session will focus on real-world cases, encouraging participants to engage, discuss, and learn from each other's experiences and perspectives. This workshop is an invaluable opportunity to learn from leading experts, refine your skills, and connect with peers in your field. Secure your spot today and take a significant step toward a successful career in renal surgery.

Submit Your Case Studies

Workshop participants can submit their own challenging cases for potential inclusion in the “Interactive Case Studies” segment. Contribute to an enriching learning environment and email your cases to meetings@kidneycancer.org by **April 4**.
